Assessment of China's Market for Centrifugal Pumps

A GCiS Limited Publication Study
Published July, 2009

China's market for centrifugal pumps is large and is growing by 10% in 2009 as a result of the Chinese government's stimulus package. Water and wastewater treatment, which is weaker than other areas of China's infrastructure, is a key focus of the RMB 4 trillion funding. Other industries such as petrochemicals, chemicals and power are demanding higher volumes and quality. Major multi-national suppliers and several Chinese conglomerates are gearing up for sustained growth rates well in excess of GDP. However, due to uneven product awareness and needs as well as a high level of state-ownership at the demand-side, identifying opportunities in the market requires a rigorous understanding of output, sales and consumption issues.

This GCiS market study draws on a three month, in-depth primary survey of around 100 of the market's supply side and channel players. It is essential reading for any professional needing accurate and detailed strategic information of this market.

Major areas covered include:

- o Market size and shares
- o Five-year Projections
- o Market Structure
- o New vs Recoat sales
- o Pricing trends
- o Distribution
- o Consumption
- o Assessment of key suppliers

GCiS is a China-based B2B research specialist. For over a decade we have been helping leading international companies succeed in this chaotic and fast-growing market. We have a team of over 50 people on the ground in China, and offices in Shanghai and Beijing.

This Study is priced at:

Complete Study:	RMB 23,600	Executive Summary:	RMB 10,400
Aggregate Analysis:	RMB 16,100	Supplier Profiles:	RMB 13,800
Competitive Analysis:	RMB 11,100	End-user Analysis:	RMB 9,800
Product Segments Analysis (each):	RMB 8,700		<i>Plus Tax.</i>

Project TOC and Brief Summary are available for serious inquiries
